TeeTime Golf App

Requirements Document

Phase 3 & Phase 4

Document Info	Details
Version	1.0
Date	December 30, 2025
Status	Draft
Classification	Confidential

Phase	Title	Focus
3	Community, Notifications & Admin Portal	Backend + Admin
4	Final Development, QA & Deployment	Production Release

Action Required: Client to provide all credentials listed in Section 4

1 Phase 3: Community, Notifications & Admin Portal

1.1 Scope Overview

Phase 3 focuses on building the social and administrative backbone of the TeeTime Golf App.

#	Deliverable
1	Community Section (QR scan to add friends, Social Rate system)
2	Waiver Wire (availability posts and notifications)
3	Firebase Cloud Messaging (FCM) for push notifications
4	Super Admin Web Portal (Dashboard, Users, Courses, Clubs, Sponsors, Notifications)

1.2 Feature Requirements

1.2.1 Community Module

Feature	
QR Code Scanning	Users can scan another golfer's QR code to add them to their roster
Friend Discovery	Search and discover golfers by name, location, or clu
Social Rate Display	Show Social Rate score (0-150+) on user profile
Mutual Connections	Indicate when two users have adc
Block/Report	Allow users to block or report inapprop

1.2.2 Waiver Wire System

Feature	Des
Availability Posts	Users post when they're available for a round (date, time, location pre
Feed Display	Chronological feed of availability posts from roster
Quick Invite	One-tap invite from waiver wire post to create
Expiration	Posts auto-expire after the specified date/tin
Notifications	Push notification when roster member posts av

1.2.3 Push Notifications (FCM)

Notification Type	Trigger
Tee Time Invite	When user receives invitation to a tee time
Invite Response	When invitee accepts/declines invitation
Roster Add	When someone adds user to their roster
Waiver Wire	When roster member posts availability
Reminder	24hr and 2hr before confirmed tee time
Social Rate Change	When Social Rate score changes significantly
Chat Message	New message in group chat (Phase 4)

1.2.4 Super Admin Web Portal

Module	Functio
Dashboard	Analytics overview: active users, tee times created, app engagement m
User Management	View/search users, suspend accounts, reset passwords, view activit
Courses	Add/edit/delete golf courses, manage course details and i
Clubs	Manage club memberships, verify club affili
Sponsors	Create sponsor profiles, manage sponsorship containe
Notifications	Send broadcast notifications, manage notification tem
Reports	Generate usage reports, expor

1.3 Phase 3 Deliverables

1. Functional community module integrated in mobile app
2. Waiver wire feature with real-time updates
3. Push notification system via Firebase FCM
4. Deployed admin portal connected to backend API
5. Admin portal documentation

2 Phase 4: Final Development, QA & Deployment

2.1 Scope Overview

Phase 4 completes all remaining features, performs comprehensive testing, and deploys to production.

#	Deliverable
1	Group Chat via Twilio SMS
2	Social Rate update logic (automated scoring)
3	Sponsorship containers in app and admin panel
4	End-to-end testing and performance optimization
5	App Store and Play Store deployment
6	Handover documentation and support

2.2 Feature Requirements

2.2.1 Group Chat (Twilio SMS)

Feature	Description
Tee Time Chat	Automatic group chat created for each confirmed tee time
SMS Delivery	Messages sent via Twilio SMS to all participants
In-App Display	Chat history viewable within the app
Notifications	Push notification for new messages
Media Support	Support for sharing images (course photos, etc.)

2.2.2 Social Rate Logic

Action	Points	Description
Base Score	100	Starting score for new users
Accept Invite	+2	User accepts a tee time invitation
Decline ¿24hr	-1	Decline with more than 24 hours notice
Cancel ¡24hr	-5	Cancel within 24 hours of tee time
No-Show	-10	Fail to attend confirmed tee time
Complete Round	+1	Successfully complete a round
Positive Rating	+2	Receive positive rating from playing partner

2.2.3 Sponsorship System

Feature	Desc
Sponsor Profiles	Company info, logo, contact details, active cam
Ad Containers	Designated spots in app for sponsor content (home, course detail
Campaign Management	Start/end dates, impression tracking, click t
Admin Controls	Create/edit sponsors, assign ads to containers, view a

2.3 Testing Requirements

Test Type	Scope
Unit Testing	All backend services and utility functions
Integration Testing	API endpoints, database operations, third-party integrations
E2E Testing	Complete user flows (registration to tee time completion)
Performance	Load testing, response time optimization, memory profiling
Security	Authentication, authorization, data encryption, vulnerability scan
UAT	User acceptance testing with beta testers

2.4 Phase 4 Deliverables

1. Final production-ready mobile app (Android + iOS)
2. Live admin portal with all features
3. App published on Apple App Store
4. App published on Google Play Store
5. Complete project documentation
6. All credentials and access handover
7. 30-day post-launch support

3 Required Credentials & Access

⚠ ACTION REQUIRED FROM CLIENT

The following credentials and access must be provided before development can proceed. Please provide all items listed below to the development team.

3.1 Firebase Credentials (Phase 3)

Credential	Format	
Firebase Project Configuration		
Project ID	String	Identifies your Firebase proje
API Key	String	Client-side API key fo
Auth Domain	URL	Fi
Storage Bucket	URL	Cloud S
Messaging Sender ID	Number	
App ID	String	
Firebase Cloud Messaging (FCM)		
Server Key	String	Backend server key
FCM API Key	String	Legacy server
Service Account JSON	JSON File	Private key

How to Obtain Firebase Credentials:

1. Go to Firebase Console
2. Create a new project or select existing project
3. Navigate to **Project Settings** (gear icon)
4. Under **General** tab, find your project configuration
5. Under **Cloud Messaging** tab, find Server Key
6. Under **Service Accounts** tab, click "Generate new private key" for Admin SDK

Why We Need These:

- **Project Config**: Initialize Firebase SDK in mobile app
- **Server Key**: Send push notifications from backend server
- **Service Account**: Authenticate backend with Firebase Admin privileges

3.2 Twilio Credentials (Phase 4)

Credential	Format	
Account SID	String (34 chars)	Unique identifier fo
Auth Token	String	Secret token f
Phone Number	+1XXXXXXXXXX	Twilio phone nu
Messaging Service SID	String	(Optional) For h

How to Obtain Twilio Credentials:

1. Sign up at twilio.com

2. Navigate to **Console Dashboard**
3. Find **Account SID** and **Auth Token** on the dashboard
4. Go to **Phone Numbers → Buy a Number**
5. Purchase a number with SMS capability
6. (Optional) Create a Messaging Service under **Messaging → Services**

Why We Need These:

- **Account SID**: Identify your Twilio account in API calls
- **Auth Token**: Authenticate API requests securely
- **Phone Number**: Send SMS messages to tee time participants
- **Messaging Service**: Handle high-volume SMS with automatic number pooling

Estimated Costs:

- Phone Number: $1.00/month
- Outbound SMS (US): $0.0079/message
- Inbound SMS (US): $0.0075/message

3.3 App Store Credentials (Phase 4)

3.3.1 Apple Developer Account

Credential	Format	
Apple ID	Email	Account login
Team ID	String (10 chars)	Identifies
Bundle ID	String	Unique app identifier
App-Specific Password	String	For CI/
Distribution Certificate	.p12 file	Code signi
Provisioning Profile	.mobileprovision	Links certifi

How to Obtain Apple Credentials:

1. Enroll at Apple Developer Program ($99/year)
2. Log into App Store Connect
3. Create a new app with unique Bundle ID
4. In **Certificates, Identifiers & Profiles**, create Distribution Certificate
5. Create App Store Provisioning Profile linked to your app
6. Generate App-Specific Password at appleid.apple.com

Why We Need These:

- **Apple ID**: Access App Store Connect for app management
- **Team ID**: Associate builds with your organization
- **Bundle ID**: Uniquely identify your app on iOS
- **Certificates**: Digitally sign app for App Store distribution

3.3.2 Google Play Console

Credential	Format	
Google Account	Email	Account
Package Name	String	Unique app identifier (e
Keystore File	.jks or .keystore	Signing k
Keystore Password	String	Passw
Key Alias	String	Na
Key Password	String	Passwo
Service Account JSON	JSON File	For automat

How to Obtain Google Play Credentials:

1. Register at Google Play Console ($25 one-time)
2. Create a new application
3. Set up app signing (Google manages or upload your own keystore)
4. For CI/CD: Create Service Account in Google Cloud Console
5. Grant Service Account access to Play Console

Why We Need These:

- **Google Account**: Access Play Console for app management
- **Package Name**: Uniquely identify your app on Android
- **Keystore**: Digitally sign APK/AAB for Play Store
- **Service Account**: Automate app uploads via CI/CD

3.4 Admin Portal Hosting (Phase 3)

Requirement	Format	
Domain Name	URL	Custom domain for admin port
SSL Certificate	Auto/Manual	HTTPS encry
Hosting Platform	Service	Whe
DNS Access	Credentials	

Recommended Hosting Options:

- **Vercel**: Free tier available, automatic SSL, easy deployment
- **AWS Amplify**: Integrates with existing AWS infrastructure
- **Netlify**: Free tier, automatic SSL, CI/CD built-in

3.5 Brand Assets (Phase 4)

Asset	Format	
App Icon	PNG (1024x1024)	App store listing an
App Name	String	Display name
Short Description	Text (80 chars)	Brief app descript
Full Description	Text (4000 chars)	Detailed ap
Screenshots	PNG (various sizes)	App store listing im
Feature Graphic	PNG (1024x500)	Google Play
Privacy Policy URL	URL	Required for bo
Terms of Service URL	URL	Recommended f
Support Email	Email	Public contact for

4 Credentials Checklist

Please check off each item as you provide it to the development team.

Credential	Phase	Status
Firebase (Phase 3)		
Firebase Project ID	3	
Firebase API Key	3	
Firebase Auth Domain	3	
FCM Server Key	3	
Service Account JSON	3	
Admin Portal (Phase 3)		
Domain Name	3	
Hosting Platform Access	3	
DNS Access	3	
Twilio (Phase 4)		
Twilio Account SID	4	
Twilio Auth Token	4	
Twilio Phone Number	4	
Apple (Phase 4)		
Apple Developer Account	4	
Bundle ID	4	
Distribution Certificate	4	
Provisioning Profile	4	
Google Play (Phase 4)		
Google Play Console Access	4	
Package Name	4	
Keystore File	4	
Service Account JSON	4	
Brand Assets (Phase 4)		
App Icon (1024x1024)	4	
App Name	4	
App Description	4	
Screenshots	4	
Privacy Policy URL	4	
Support Email	4	

5 Estimated Timeline

Phase	Milestone	Duration	Dependencies
Phase 3: Community, Notifications & Admin Portal			
3.1	Community Module	2 weeks	None
3.2	Waiver Wire System	1 week	3.1
3.3	FCM Integration	1 week	Firebase credentials
3.4	Admin Portal Development	3 weeks	Domain + hosting
3.5	Integration Testing	1 week	3.1-3.4
	Phase 3 Total	**8 weeks**	
Phase 4: Final Development, QA & Deployment			
4.1	Group Chat (Twilio)	2 weeks	Twilio credentials
4.2	Social Rate Logic	1 week	None
4.3	Sponsorship System	2 weeks	None
4.4	E2E Testing	2 weeks	4.1-4.3
4.5	Performance Optimization	1 week	4.4
4.6	App Store Submission	1 week	Store credentials + assets
4.7	Documentation & Handover	1 week	All complete
	Phase 4 Total	**10 weeks**	

Total Estimated Duration: 18 weeks

Timeline assumes timely delivery of all required credentials.
Delays in credential delivery will impact project timeline.
