Milestone 2: Mobile App Development Progress

TTS Golf App

December 21, 2025

Session Summary

This document tracks the features completed on December 21, 2025.

1 Completed Features

1.1 1. Group Visibility Fix

- ✓ Fixed issue where only group creator could see groups
- ✓ Updated backend to return groups where user is owner OR member
- ✓ Added `isOwner` field to distinguish ownership
- ✓ Updated frontend to show "Member" badge for non-owners
- ✓ Hide edit/delete buttons for non-owners

Files Modified:

- `backend/repositories/rosterRepository.js`
- `backend/controllers/rosterController.js`
- `TTSGolfApp/services/api.ts`
- `TTSGolfApp/screens/roster/GroupsList.tsx`
- `TTSGolfApp/screens/roster/GroupDetail.tsx`

1.2 2. Login Screen Redesign

- ✓ Clean white background design
- ✓ Formatted phone input `(555) 123-4567`
- ✓ Clear button for phone input
- ✓ Focus and error states
- ✓ Green "Next" button
- ✓ 6-box OTP input design

Files Modified:

- `TTSGolfApp/screens/LoginScreen.tsx`

1.3 3. Signup Flow Updates

- ✓ Updated phone verification page to match login design
- ✓ Hardcoded +1 country code (US only)
- ✓ Removed country code modal
- ✓ Updated preferences page with dropdown selectors
- ✓ Deleted unused country code components
- ✓ Fixed validation to check all required fields

Files Modified:

- `TTSGolfApp/screens/onboarding/PhoneVerificationPage.tsx`
- `TTSGolfApp/screens/onboarding/PreferencesPage.tsx`
- `TTSGolfApp/screens/onboarding/OnboardingScreen.tsx`
- `TTSGolfApp/components/index.ts`
- `TTSGolfApp/constants/index.ts`
- `TTSGolfApp/types/index.ts`

1.4 4. Manual Invite API Fix

- ✓ Added "manual" to allowed invite types in backend
- ✓ Created `ExtendedFriend` interface with phone and rosterId
- ✓ Fixed player ID handling for app users vs phone contacts
- ✓ Added callback for group members loading
- ✓ Used `useRef` for immediate state access
- ✓ Fixed type signatures for proper data flow

Files Modified:

- `backend/routes/teeTimes.js`
- `backend/controllers/inviteController.js`
- `TTSGolfApp/screens/CreateTeeTime/index.tsx`
- `TTSGolfApp/screens/CreateTeeTime/ManualInviteStep.tsx`
- `TTSGolfApp/services/api.ts`

1.5 5. Date Picker Calendar Fix

- ✓ Changed calendar to US format (Sunday first)
- ✓ Fixed day alignment issue
- ✓ Past dates now grayed out and disabled
- ✓ Users can select any future date

Files Modified:

- `TTSGolfApp/screens/CreateTeeTime/DatePickerModal.tsx`

1.6 6. Full Calendar View Fix

- ✓ Extended date range from 1 month to 4 months
- ✓ Tee times now visible beyond one week
- ✓ Calendar reloads on month navigation

Files Modified:

- `TTSGolfApp/screens/FullCalendarScreen.tsx`

2 Bugs Fixed

1. **Group visibility** – Non-owners couldn't see groups they were members of
2. **Manual invite API error** – "manual" wasn't in allowed invite types
3. **Player ID handling** – Roster entry IDs were being sent as user IDs
4. **Group member selection** – Phone numbers weren't passed for non-app users
5. **Stale state in async** – Used `useRef` to fix closure issues
6. **Calendar day alignment** – Monday-first format caused wrong day selection
7. **Calendar date range** – Only showed tee times for current month

3 Technical Improvements

- ✓ Using `FlashList` for all lists
- ✓ Components memoized with `React.memo()`
- ✓ Callbacks using `useCallback`
- ✓ Using `useRef` for immediate state access
- ✓ TypeScript interfaces for all data types
- ✓ Proper error handling with detailed messages

4 Notes

- Friends and Roster are the same – friends are automatically in roster
- Phone number uses hardcoded +1 (US only)
- All invite types supported: roster, fcfs, manual, open
- Calendar fetches 4 months of data for smooth navigation
